

iddero **Home Server 3**

Compact home server for
smartphone or tablet operation

intelligent evolution

iddero Home Server 3

Full control of the smart home, without wall-mounted touch panels

Iddero Home Server 3 is a compact home server for control and monitoring of KNX installations. It combines advanced functionality with a powerful, intuitive visualisation. Control from smartphones and tablets is possible using the **Iddero Mobile** app (iOS / Android). A built-in web-based user interface also allows access from any device running a standard web browser. Both direct (LAN) connection and secure cloud-based operation are supported; no additional configuration required.

Graphical navigation through maps and zones

Up to 512 control pages (more than 4000 functions)

Integrated KNX bus coupling unit (TP1)

Voice control through Amazon Alexa (*)

8 multifunction inputs for push buttons, sensors, etc.

Weekly time schedules (with configurable date ranges)

8 independent thermostats with separate 2-stage heating and cooling

User-editable scenes

Event notifications via push, e-mail, or GSM (**)

Logic and arithmetic functions

Presence simulation with day and night schedules

Alarm monitoring with event log

Please check availability
